The Mara Sideboard celebrates the natural beauty of Guanacaste trees, showcasing their distinctive grain and organic shapes in a way that allows the wood to take center stage. Our skilled ebanistas exp ertly wrap large oyster cuts around the sides, transforming each piece into a canvas that highlights the tree's rich textures and unique characteristics. This is a perfect example of a backwards design in w hich the tree dictated the design instead of the design being forced into the tree.Finish: Ochre Guanacaste, Sand American OakWood: Guanacaste and ElmDimensions: W 94.5" x D 21.6" x H 33.5"
