

Leeds Statue

Short Description: Bronze Finished Iron

SKU: BGW205

$225.00

Modern art meets the stone age. There's a prehistoric mystery imbued in the Leeds Statue, an imaginative marriage of two figures into a single solid form. Its rock-like look is achieved through a metallic casting process, where in the iron is shaped and then finished in elemental, textured bronze. Though their features are abstracted and minimalist, the figures of the Leeds statue communicate intense emotion, stemming from their togetherness. A set of limbs in repose are fashioned on either side of the piece, allowing the statue to sit on its own four legs. In a sitting room, office, or study, the Leeds is a striking ode to friends and family.Dimensions: W 7" x D 7" x H 7"
